\$175 for Six  
week series

### **My child is hearing. Why sign language?**

Sign language is an excellent communication tool for children. It can help hearing children develop verbal communication skills as well as visual learning skills. It may even aid in escaping the communication barrier of the "terrible twos"

### **My child is deaf/hard of hearing. Why music?**

Music therapy uses varying components of music, including rhythm, which can be appreciated by everyone! This is an excellent opportunity to involve your deaf/hard of hearing child in a musical experience!
